

4.8 stars from 1,532 Google reviews (October 5). Patients praise thorough exams, clear explanations and attentive care.

Park Slope Eye has earned patient trust and already stands out on AI and Google. But its myopia care is not recommended consistently.

14 / 16

AI answers recommended Park Slope Eye

Both omissions were for myopia management

WHAT HAPPENED WHEN PATIENTS ASKED

THE EXACT PATIENT QUESTION	CHATGPT	GEMINI	CLAUDE	GOOGLE AI MODE
I'm looking for an eye doctor in Park Slope, Brooklyn. Who would you recommend?	2ND Linked to your website	1ST Two different addresses; no link to your site	1ST First practice suggested	1ST Linked to your website
I need an eye exam in Park Slope, Brooklyn. Where would you recommend I go?	2ND Linked to your website	1ST AND 2ND Two lists; conflicting location	1ST First practice suggested	1ST Older boutique also suggested
I have VSP and need an eye doctor in Park Slope, Brooklyn. Who would you recommend?	1ST VSP confirmed; your site linked	1ST Conflicting VSP network details	1ST VSP acceptance not confirmed	1ST Older boutique also suggested
I'm looking for an eye doctor in Brooklyn for my child's myopia management. Who would you recommend?	2ND Named four treatment types; your site linked	NOT RECOMMENDED Park Slope Eye not listed	4TH Asked patients to call to confirm myopia care	NOT RECOMMENDED Park Slope Eye not listed

October 7, 2026 original tests plus rank supplements. Exact questions shown. Positions are answer order, not quality scores. Results can change; these tests did not measure lost appointments.

You offer four ways to manage myopia. Two AI systems recommended other practices instead.

Your website lists Stellest glasses, NaturalVue daily contacts, Ortho-K and low-dose atropine.

Google finds Park Slope Eye. Myopia searches still favor other practices.

The correct facts are 682 Union Street and in-network VSP. Yet some AI answers contradicted these details, and myopia care ranked lower on Google.

I'm looking for an eye doctor in Brooklyn for my child's myopia management. Who would you recommend?	2ND	3RD	5TH	Behind other practices in all three result lists

THE THREE PRIORITIES

01 Make myopia care easier to find. **02** Correct location and insurance conflicts. **03** Repeat the tests to check progress.

KEEP WHAT ALREADY WORKS

Keep your core website, practice name, doctor profiles, clear service pages and patient-friendly booking. Build on the reputation patients already trust.

Families were shown other practices for myopia care you already offer. Conflicting addresses and insurance details can also leave patients unsure where to book.

A one-time edit is not ongoing management. Built by an independent OD owner, GSA strengthens myopia pages, aligns your practice details, keeps them current, and repeats the same AI and Google searches to check progress.

LET'S FIX THE GAPS

\$500 setup + \$149/month

Reply "Let's talk" about having GSA address these problems and manage your website, so patients have a clearer path to finding your practice and booking an appointment.
